

## DP400 - Wide spiral round wire link belt

The wire belt is made from thin wound spirals, alternatively with a left and right orientation. Through undulated cross rods, a precise adjustment of the spirals is achieved. The spirals are made of round wire. The connecting cross rods are crimped.

|                |                                          |
|----------------|------------------------------------------|
| <b>s</b>       | <b>spacing of spiral coils</b>           |
| <b>t</b>       | <b>spacing of connecting cross rods</b>  |
| <b>d / a×b</b> | <b>diameter / profile of spiral wire</b> |
| <b>D</b>       | <b>diameter of connecting cross rods</b> |

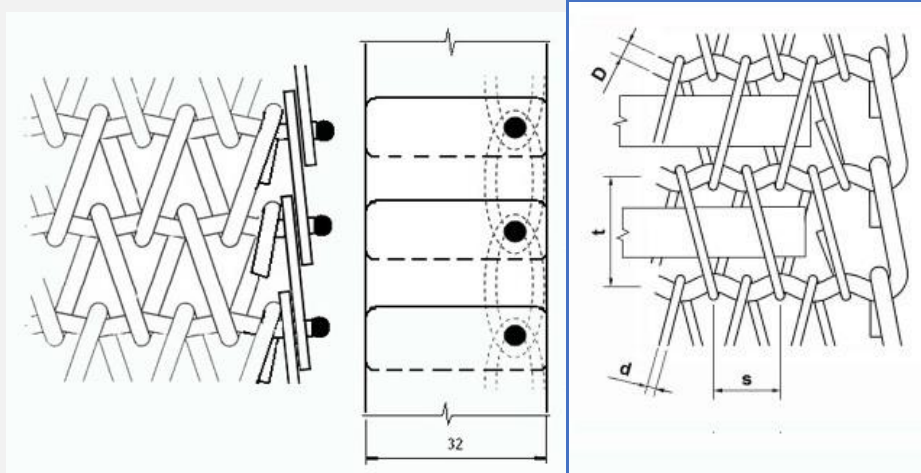

## Types of wire belts according to edges

**welded-ball**

**inside bend**

**loop**

**with sides**

**with spacers**
